

Hepatitis C: 25 Years Since Discovery

HEPATITIS **C** 25 YEARS

2014 marks the 25th anniversary of the discovery of the Hepatitis C virus. Since the virus was discovered in 1989, significant public health and research advances have led to great progress in curbing new infections and developing life-saving treatment options. Unfortunately, millions of Americans continue to live with this disease and most don't know they are infected. This timeline highlights the milestones from the past 25 years since the discovery of the Hepatitis C virus.
